Summary

I am a **Product & UX designer** with a background in fashion and XR, focused on **systems-level** product thinking. I care about **user agency**, designing products that make choices easier rather than making them for people. I work across systems, architecture, and interface design.

Education

M.Des. — XR Design
Indian Institute of Technology,
Jodhpur
2024 — 2026

Professional Experience

Indian Institute of Technology, Jodhpur JUL 2024 — APR 2026
Research Assistant JODHPUR

Led research activities in the field of **proximity-based** procedural animation to validate for stand-alone VR, leading to a rise of **35% in user engagement**.
Built testing environments to bench-mark performance costs and **user immersion** in reactive XR spaces.

MintLabs Events and Production JUN 2025 — JUL 2025
Immersive Design Intern MUMBAI

Designed the **interaction model** for a yoga kiosk installations, by applying **new media design** principles to translate physical poses into responsive, intuitive feedback for event attendees.
Collaborated within a 2-person team to deliver a kiosk installation and **AR experience**.

Indian Roars APR 2025 — MAY 2025
Product Strategy & Development Intern MUMBAI

Conducted rigorous UX research and interviewed **10+ industry stake holders**, including event organizers from **JW Marriott** and **Johnson & Johnson**, to identify gaps in unorganized event space.
Collaborated within a **5-member team** to design unified portal for event **registration, ticketing**, and studied multiple **stakeholders management** workflows.

Projects

EventEase JUL 2024 — APR 2026
Interviewed **16 agency professionals**, and created a map of **9 stakeholder categories**, 12 distinct roles, and **12 concurrent information** flows within the Indian event ecosystem.
Designed a **parent-child form system** that eliminated **double-entry**, automated milestone updates, and role-specific boards.

Procedural Effects for VR Immersion JUN 2025 — JUL 2025
Researched what causes **presence disruption** in VR experiences and designed a **proximity-based system** that increased session duration by **35%** and re-engagement by **37.5%**.

D2C Trust Architecture APR 2025 — MAY 2025
Developed strategic **Checkout Conversion Rate** metrics to bridge a **2.4%** market performance gap between US and Indian market.
Evaluated Indian market **ToFU** user journeys to isolate **user-trust** friction causing 99.6% funnel drop-off.
